Rebiotix to Present at BioCentury's 24th Annual NewsMakers in the Biotech Industry Conference

ROSEVILLE, Minn. – August 23, 2017 – Rebiotix Inc., a late-stage clinical microbiome company focused on harnessing the power of the human microbiome to treat challenging diseases, announced today that it will present at BioCentury's 24th Annual NewsMakers in the Biotech Industry Conference, to be held September 8, 2017 at the Millennium Broadway Hotel & Conference Center in New York City.

Lee Jones, co-founder, president and CEO, will present Rebiotix's corporate growth strategy and discuss the company's pioneering Microbiota Restoration TherapyTM (MRT) platform and rapidly advancing drug development pipeline, highlighted by RBX2660 and RBX7455. RBX2660 is currently being evaluated in an international Phase 3 clinical trial for the prevention of recurrent *Clostridium difficile* (*C. diff.*) infection, while RBX7455, a lyophilized, non-frozen, oral capsule formulation, is the subject of a Phase 1 clinical study for the prevention of recurrent *C. diff.* infection.

Event: BioCentury's 24th Annual NewsMakers in the Biotech Industry Conference
Date: Friday, September 8, 2017
Time: 1:30-1:55 p.m. (Eastern Time)
Location: Millennium Broadway Hotel & Conference Center - Room 402/3

About *Clostridium difficile* Infection

Clostridium difficile (*C. diff.*) infection is a serious and potentially fatal gastrointestinal disease, characterized by severe diarrhea, fever, and loss of appetite. It is a leading healthcare-associated infection (HAI), and in the U.S. alone, there are about 500,000 people infected and over 29,000 deaths annually from the disease. Currently, 20-30% of patients with *C. diff.* go on to experience more than one episode of the disease, which is known as recurrent *C. diff.* infection. Recurrent *C. diff.* infection is especially challenging to treat as, to date, there are no approved microbial-based drugs to treat patients with two or more recurrences.

About Rebiotix Inc.

Rebiotix Inc. is a late-stage clinical microbiome company focused on harnessing the power of the human microbiome to revolutionize the treatment of challenging diseases. Rebiotix possesses a deep and diverse clinical pipeline, with its lead drug candidate, RBX2660, in Phase 3 clinical development for the prevention of recurrent *Clostridium difficile* (*C. diff*) infection. RBX2660 has been granted Fast Track status and Breakthrough Therapy designation from the FDA for its potential to prevent recurrent *C. diff*. infection. Rebiotix's clinical pipeline also features RBX7455, a lyophilized, non-frozen, oral capsule formulation, which is currently the subject of an investigator-sponsored Phase 1 trial for the prevention of recurrent *C. diff*. infection. In addition, Rebiotix is targeting several other disease states with drug products built on its pioneering Microbiota Restoration Therapy™ (MRT) platform. MRT is a standardized, stabilized drug technology that is designed to rehabilitate the human microbiome by delivering a broad consortium of live microbes into a patient's intestinal tract via a ready-to-use and easy-to-administer format. For more information on Rebiotix and its pipeline of human microbiome-directed therapies, visit www.rebiotix.com.
